Education

University of Houston

August 2024 - Dec. 2027

Bachelor of Science in Computer Science, Minor in Mathematics

Coursework: Object-Oriented Programming, Data Structures & Algorithms, Database Systems, Machine Learning, Statistics, Digital Image Processing

Wharton County Junior College

August 2021 - May 2024

Associate of Science in Computer Science

Projects

PrepBot | Next.js, TypeScript, Express, Supabase, OpenAI, Stripe

June 2026 - Present

- Built and deployed an AI-powered interview platform that generates role-specific mock interviews and personalized feedback from uploaded resumes and job descriptions.
- Engineered a full-stack Next.js/Express/Supabase architecture integrating OpenAI APIs for dynamic interview generation and evaluation.
- Implemented email verification, password recovery, API rate limiting, and input validation to strengthen authentication and application security.
- Integrated Stripe Checkout and webhooks to automate subscription purchases and feature entitlement management.

Full-Stack Restaurant POS System | MySQL, SQL, Next.js, Express.js, JWT

March 2026 - April 2026

- Led a team of 5 developers in building a multi-role, restaurant POS and operations platform with employee role-based access, order/kitchen/checkout workflows, back-office management, reporting and cloud deployment.
- Enforced business rules across orders, staffing, inventory, and payments to reduce invalid states.
- Implemented end-to-end auth and authorization flows with JWTs and role-aware middleware across a deployed production-like full-stack application.
- Developed sales, inventory, and operational reporting dashboards using SQL queries and interactive visualizations to surface restaurant performance trends.

CougarAI Website | TypeScript, React.js, Tailwind CSS, Flask, Google API, Psycopg2

Dec. 2025 - Aug. 2026

- Redesigned a full-stack organization website serving 200+ active users, implementing a modular React/Tailwind architecture to improve responsiveness and maintainability.
- Implemented password and Google/Microsoft/Discord OAuth flows with email verification, password recovery, session refresh, and case-insensitive account matching.
- Delivered admin and member tools for events, points, notifications, officer directories, and budget receipts with safeguards against duplicate transactions and negative balances.

University Marketplace App | React.js, Docker, PostgreSQL, JWT

October 2025 - Dec. 2025

- Created a marketplace application for UH students and alumni to buy and sell used books and furniture.
- Implemented JWT-based authentication and protected API routes to secure account-specific operations.

Leadership

Lead Webmaster

Dec 2025 - Present

CougarAI

Houston, TX

- Lead a team of four software engineers in developing and maintaining CougarAI's full-stack website and internal tools supporting 200+ active members.
- Coordinate development priorities with organization officers, translating requirements into technical features supporting events, communication, and member engagement.

Technical Skills

Languages: Java, Python, C++, R, JavaScript, SQL, HTML, TypeScript

Frameworks and Libraries: React.js, Next.js, Node.js, Express.js, Tailwind CSS, Vite, Flask

Databases: PostgreSQL, MySQL, MongoDB, Supabase

Developer Tools: Docker, VS Code, Eclipse, RStudio, Git, JWT, REST APIs, Vercel, Azure, OpenAI, Stripe
